Introduction

The 2017 Budget was developed based upon the guidance issued by the Board of Selectmen. The goal of the Board was not to level fund budgets except for salary increases due to the wage classification system adjustments, personnel cost increases, insurance and the adjustments to Parks & Recreation to manage the community center for a full budget year.

This document contains the narrative explanations of the Town Administration Budgets. The Administration Budgets consist of multiple functional areas of service the town government provides to its citizens.

Goals and Objectives for 2017

A strategic planning process was conducted for the administrative functions to determine what the goals, objectives and the budget priorities should be. The staff at the town hall developed the strategic plan.

The primary objectives for 2017 involves our continuing efforts to modernize the administrative services we provide. The Town has made considerable progress in modernizing many of our processes. We continue to meet our objectives in this regard which were started in 2013 through the present. This process is expected to continue through 2017.

1. Enhance internal communication with staff. The objective is to ensure staff at all levels are informed about programs, policies and procedures.
2. Cross training of personnel within the administrative functions. The tax collector will be working with the assessing clerk to ensure each person has an understanding of the functions and requirements for each other's position.
3. Implementation of a wage classification system for all personnel. The objective is to ensure the Town can retain trained qualified personnel. The wage classification system would base salaries on what competing positions pay for the same job function. Additionally the system would prevent salary compression and ensure similar job functions are compensated fairly.
4. Streamlining of the fee system for building permits. The goal is to find approaches to make the fee system more understandably and simplified.
5. Work with the Board of Selectmen to implement strategic planning for the entire town government. The objective is to work with the Board to develop the "big picture", set

priorities and ensure the Town is working as a whole to provide quality services to its citizens and businesses.

6. Transparency initiative. Providing more information to the public via the website. Keeping the website updated. Providing greater access to public documents on the website.
7. Town Hall improvements. Development of a plan to enhance the customer service area at town hall. Exploring options to enhance the functionality of the building.
8. Working with the NH Park Service to enhance Bear Brook State Park and make the general public aware of its value to enhance tourism.

Some of the objectives will require additional costs while others will involve transferring resources from one area to another.

EMERGENCY MANAGEMENT

INTRODUCTION

This section is the proposed 2017 budget for the Emergency Management function.

The Emergency Management function serves as the coordinating organization for the town's response to disaster. Emergency Management addresses natural and man-made disasters that pose a risk to the community. The Emergency Management function is managed by the Emergency Management Director and two Deputy Emergency Management Directors who serve in an unpaid capacity. The functions of Emergency Management are broken down into four primary tasks;

Mitigation: The town's hazard mitigation plan was updated in 2016. The hazard mitigation plan identifies potential hazards both weather related and man-made. Our mitigation plan is multifaceted. Flooding issues along the Suncook River are a major component of our mitigation efforts. We have applied for and received four flood acquisition grants from FEMA to purchase properties in the flood plain that were at significant risk. The town has received approximately \$4.5 million in acquisition grants since 2008. We have purchased 34 homes in the floodplain. These homes have been demolished to allow for additional floodplain capacity. We received an additional \$746,000 of the State Capitol Budget to purchase five more homes. The last of these homes were demolished in the fall of 2013. The total number of homes purchased was 34 by the end of 2013. The Town received an additional grant to update the Hazard Mitigation Plan to include a specific Suncook River Hazard Mitigation plan for the floodplain. This plan was completed in 2016.

Preparation: We have implemented a comprehensive plan to prepare for risks to the community. The Emergency Operations Plan was updated in August of 2016. The plan was previously updated in 2011.

Respond: Through our preparedness plans which we exercise annually we have greatly enhanced our ability to respond quickly and effectively to a variety of threats to the community. We have applied for additional grant funds to enhance our ability to run a shelter, respond to water rescues, operate our emergency operations center and provide emergency public information to our citizens. We have a robust citizen's volunteer group that will manage our shelter and assist citizens with special needs.

Recovery: The town has received FEMA disaster funds every year since 2006 except for 2009 in regards to flooding, ice storms and other storm related disasters. Our recovery plans are tightly

interwoven with the State and Federal recovery plans for major disasters. The primary objective is to take steps that will allow the community’s residents, businesses and government services to operate effectively as soon as possible after a disaster strikes. Grant funds were received in 2016 to update the Recovery Plan which will be completed by the end of September 2016.

NACCHO membership offers unique benefits to local health departments. The organization provides networking forums, educational seminars and grant opportunities.

NACCHO members get advice and support from a powerful network of expert colleagues on a wide range of public health issues. NACCHO's interactive e-mail list services connect the local health officer to public health professionals with similar interests and concerns, such as immunization, emergency preparedness, and rural health. As the national voice for local health departments, NACCHO provides its members with the latest updates on key public health issues and opportunities to take action. Members have an opportunity to communicate the value of local health departments with their own policymakers and help impact policy. NACCHO offers resources to help local health departments be sustainable and successful in activities that range from screenings, inspections, and training programs to the essential tasks of formulating policy and health impact assessments.

NEHA is the only association that covers areas of environmental health and protection including terrorism and all-hazards preparedness, food protection, hazardous waste, onsite wastewater, air and water quality, epidemiology and environmental health management.
