Appliances such as gear-box-driven fire pumps amplify the inherent torsional vibrations cause by the engine fireing pulses of the 6.7L diesel resulting in annoying "clatter" when operating under light or no load. This vibratec viscous damper absorbs these torsional vibrations resulting in a smooth and quiet drive-line. The viscous damper does not eliminate the "rattle" you may hear from the PTO gear lash when PTO is not engaged. The viscous damper provided is machined to be sandwiched between two 1350 series companion flanges.</i>
