

Hi All,

We have thrilling news. Our first four Community Power programs signed contracts for all-requirements power last week, first in the state again for Keene! Plus Swanzey, Marlborough and Wilton. Here are their program rates:

 STANDARD POWER  GoodEnergy	Plan	Rate (cents/kWh)	Renewable
	Default	11.47	33%
	Green 50%	12.05	50%
	Green 100%	13.9	100%
	Basic	11.10	23.4%

Compare these to utility default rates of 20.2 cents per kilowatt-hour for Eversource and 13.9 cents for NHEC.

We are thrilled to be first in the state with rates, thrilled to demonstrate these deep savings for our communities, including for all renewable energy products, and we look forward to moving forward to find great rates for your programs too.

Please share this exciting news. There is no reason to oppose a plan that won't launch without savings, or opt out of a program default rate lower than the utility default rate, especially when customers have the flexibility to opt out, join or change products at any time.

Good luck with your town vote, let me know when you have news, or if you have any questions!
