

Petition to make Riverside Drive a town road or help with expenses to maintain

Allenstown has created a driving hazard to the residents of Riverside Drive for many reasons. One that is the most concerning is the fact that the town bought up a bunch of privately owned lots on the road. This makes these lots now public and can be used publicly. These previously private owned lots would have potentially participated or funded the maintenance of the road. This would have greatly reduced the burden to the other residents on the road. The town does not help the residents with any expense to maintain the road leaving residents with the hardship. They decided to purchase land from private residents. The town has publicly owned land on a private road which they are obligated to help with expenses to maintain this road for the safety of the residents on the road. Please either help with expenses or adapt the road as a public road.
